

PCI DSS, ISO or HIPAA Assessment and Gap Analysis

The Payment Card Industry (PCI) Data Security Standard (DSS) enables merchants and service providers to assess their security status by using a single set of security requirements for all payment organizations. 12 information security requirements have been defined within 6 control objectives. The ISO 27002 Information Standard defines 11 clauses and the HIPAA Security Rule establishes requirements for covered entities. Is your organization impacted by PCI DSS, ISO or HIPAA requirements?

How Prepared is Your Organization for Meeting Compliance Requirements? The ecfirst PCI DSS, ISO and HIPAA Assessment and Gap Analysis Service enables your organization to better understand the current state of compliance and evaluate a roadmap for remediation prior to completing a formal audit. This service does not replace an audit – it does help identify and address gaps prior to a complete and comprehensive compliance audit.

OUR COMMITMENT TO YOU

- 1) Document where all your organization's credit card data resides.
- 2) Analyze security capabilities that currently protect credit card data and other sensitive information wherever it may reside
- 3) Review current technology architecture including perimeter defense capabilities
- 4) Examine how credit card and other sensitive data flows across the organization

YOUR COMMITMENT TO US

- 1) Interviews with key members of IT staff and management.
- 2) Copies of your network and security documentation including policies and procedures.

OUR DELIVERABLE TO YOU

A complete report of our findings – in an organized format - outlining the state of PCI DSS, ISO and/or HIPAA compliance. This document will clearly establish areas that your organization is in **compliance**, **partial compliance** or **non-compliance** with the requirements of regulations that impact your business.

Fixed Fee with No Expenses: Call for details and a customized proposal exclusively for your organization.
