A Compliance Requirement
Compliance mandates require organizations to develop an enterprise system security plan. An enterprise system security plan is one of the items typically requested as part of an on-site investigation or a compliance audit.

ecfirst is focused in the area of cyber security and compliance and has deep experience enabling organizations comply with regulatory mandates and standards including HIPAA, HITECH, PCI DSS, ISO 27000, and more.

Client Testimonial
“ecfirst was engaged to develop a comprehensive enterprise information security plan. The process of development of the plan included interviews, review of critical documents, including policies and information related to security controls implemented.”

“The ecfirst Security Team was very responsive and tailored the information security plan to our specific requirements, including compliance mandates/standards such as HIPAA, HITECH, ISO 27002 and NIST SP 800-53. Work was professionally executed and of exceptional quality. ecfirst has worked hard to earn our confidence and our trust. We look forward to work with ecfirst again in the near future.”

Tom Brink, Director IT Operations, HIPAA Security Officer
Maricopa Integrated Health System

A Customized Enterprise Security Plan
ecfirst can develop a customized enterprise information security plan specific to your organization based on your security priorities and compliance mandates.

The ecfirst enterprise information security plan is based on the proprietary bizSHIELD™ methodology developed by ecfirst and influenced by standards that include NIST and the ISO 27000. This plan provides the foundation for your enterprise security policies and procedures. This plan must be aligned with your business objectives.

The ecfirst enterprise information security plan establishes the blueprint for your security and compliance priorities. Get this plan developed now and get ahead with your security initiatives and projects.
